EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- 1) Claim 9, line 2, **change “rom” to – from --.**
- 2) Claim 11, line 1, **change “of clam 10” to – of claim 10 --.**
- 3) Claim 14, line 1, **change “of clam 10” to – of claim 10 --.**
- 4) Claim 19, line 3, **change “rom” to – from --.**

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

As per claims 1,10, the prior arts of record, taken alone or in combination, fail to disclose or render obvious a light detection system having a detector and located adjacent to and placeable in optical communication with the flow structure and positioned in a lateral or a non co-linear relationship with the light emission system for receiving a desired portion of the light scattered by the particulate matter, a calibration system including a calibration shutter located between the light emission system and the light detection system and remote from the flow structure to selectively admit light from the light emission system to enter the light detection system for calibration of the monitor without traveling through the flow structure, in combination with the rest of the limitations of the claims.

As per claim 20, the prior arts of record, taken alone or in combination, fail to disclose or render obvious a light detection system located adjacent the second aperture and external to the flow structure in a lateral relationship with the light emission system, the light detection system including a detector and a collector lens having principal planes; and a calibration system comprising a beam splitter, a mirror operatively associated with the light emission system for generating a calibration light beam, and a rotary shutter system located between the light emission system and the light detection system for selectively transmitting the calibration light beam or a desired portion thereof to the light detection system, the rotary shutter system including a rotary

shutter for directing light in a plane generally parallel to the principal planes of the collector lens, in combination with the rest of the limitations of the claim.

As per claim 25, the prior arts of record, taken alone or in combination, fail to disclose or render obvious the step of directing light from the light source to the light detection system via a path that does not travel through the flow conduit and which is directed in a plane generally parallel to the principal planes of the collector lens to yield information corresponding to the cleanliness of the collector lens, in combination with the rest of the steps of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tu T. Nguyen whose telephone number is (571) 272-2424. The examiner can normally be reached on T-F 7:30-5:30.
